

CALIFORNIA ENERGY COMMISSION
Fuel Delivery Temperature Study
Advisory Group Meeting

WEDNESDAY, APRIL 23, 2008
9 a.m. – 12 p.m. Pacific Standard Time
CALIFORNIA ENERGY COMMISSION
1516 Ninth Street
Sacramento, California 95814
First Floor, Hearing Room B

California Energy Commission's review of the following items:

- ATC equipment costs and operation
- Temperature Data

Discussion Items

- Status-quo operation of retail station
 - Do all suppliers sell to service stations the same way (net or gross) or are there differences in the marketplace?
- Business impacts of ATC implementation
 - Market (pricing) impacts from ATC costs
 - Timing of ATC implementation and when costs and benefits occur
- Fairness and transparency of ATC implementation
 - What will change from status-quo?
 - ATC technology and labeling issues
- The Canadian experience - How it relates to California
 - What is the story behind the economic decision of voluntary ATC implementation in Canada?
- Leak Detection
 - Would ATC improve current leak detection capabilities for California retail stations?
